1 DISCLAIMER

This document has been prepared with the objective to provide basic information about the subject business proposition. The content of the document has been derived from data and information collected from various reliable secondary and primary sources and is based on certain assumptions. While reasonable due diligence has been carried out during information collection and working out the presented calculations, the reader is strongly encouraged to carry out any further scrutiny and diligence to collect any other information that may be deemed necessary to take an informed decision. Professional advice from qualified technical expert/consultant should preferably be sought before taking any decision to act upon the information presented in the document. Department of Agriculture, Government of Punjab does not assume any liability for any financial or other loss in consequence of undertaking any activity on the basis of the information provided in the document.

2 EXECUTIVE SUMMARY

Nature has blessed Pakistan with an ideal climate for growing a large variety of fruits, most notably Mango, Citrus, Guava, Apple and etc. The growing demand of fruit drinks, juices, processed fruit and value added fruit products in local / international market provides ample opportunities for investment in fresh fruit & vegetable processing on commercial basis.

This particular pre-feasibility study is for setting up a Fruits & Vegetables Pulping Unit mainly for Mango, Guava & Tomato. The proposed unit is a large size business venture and assumed to be located in the cities nearby to Mango, Guava and Tomato producing areas, such as Multan, Khanewal and Muzaffargarh where basic infrastructure is available for easy transportation of raw material and finished goods. The finished product is pulp of Mango and Guava (i.e. used as basic raw material for juices, ice creams and other value added fruit products) along with Tomato paste (i.e. used mainly for tomato ketchup production and cooking).

The unit will have the installed capacity of producing 17,280 tons of Mango Pulp, 14,720 tons of Guava Pulp and 2,170 tons of Tomato Paste per year on seasonal basis. The unit will process Mango Pulp for 60 days, Guava Pulp for 50 days and Tomato Paste for 40 days. The maximum operational time of plant is assumed as 16 hours however, initial operational capacity is assumed at 50% while maximum operational capacity utilization is considered as 100%. This production capacity is estimated to be economically viable and justifies the huge capital as well as operational costs of the project. However, complete adherence to best fruit & vegetable pulping practices is critical to the success of this project. Therefore, technical knowledge and experience to setup and run this plant is absolutely necessary.

The Total estimated cost for setting up the proposed Fruits & Vegetables Pulping Unit is Rs. 1,745.36 million with fixed investment of Rs. 1,473.38 million and working capital Rs. 271.98 million. The project NPV is around Rs. 1,224.73 million, with an IRR of 30% and Payback Period of 4.84 years. The project will provide employment opportunities to 56 people.

April 2017

3 PURPOSE OF THE DOCUMENT

The objective of the pre-feasibility study is primarily to facilitate potential entrepreneurs in project identification for investment. The project pre-feasibility may form the basis of an important investment decision and in order to serve this objective, the document/study covers various aspects of project concept development, start-up, and production, marketing, finance and business management.

The purpose of this document is to facilitate potential investors in **Fruits & Vegetables Pulping Unit (Mango, Guava & Tomato)** by providing them with a general understanding of the business with the intention of supporting potential investors in crucial investment decisions.

The need to come up with pre-feasibility reports for undocumented or minimally documented sectors attains greater imminence as the research that precedes such reports reveal certain thumb rules; best practices developed by existing enterprises by trial and error, and certain industrial norms that become a guiding source regarding various aspects of business set-up and it's successful management.

Apart from carefully studying the whole document one must consider critical aspects provided later on, which form basis of any Investment Decision.

4 BRIEF DESCRIPTION OF PROJECT & PRODUCT

Nature has blessed Pakistan with an ideal climate for growing a large variety of fruits & vegetables, most notably Mango, Citrus, Guava, Apple and Tomato etc. It has been observed that demand of value added fruits products, especially pulps, has increased tremendously due to its use as raw material for juices, ice cream, fruits yogurts and other similar items in both local and international markets.

Pakistan is the 5th largest fresh mango exporter of the world and has huge demand in the international market due to rich flavor, aroma, and health value, i.e., nutrients and minerals contents. However, we are no where in the export of mango

pulp that has huge exporting potentials. Similarly, fruit juices and beverages industry is recognized as the leading industries, which also requires adequate supply of fruit pulp from the local market. Additionally, in order to cater for the demand of local / international markets our fruit processors requires modern processing facilities.

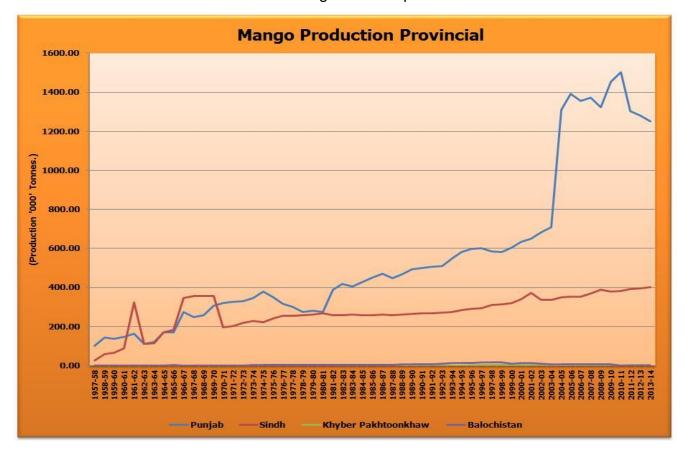

According to the proposed business model, fresh fruits & vegetables will be purchased either directly from farmers or distributors, pulping will be carried out and finished good will be sold both in local and international markets.

The major scope of processing activities will include post-harvest handling, ripening, sorting, pulping, packing and logistics. For that purpose, fully automatic imported machinery / plant comprising of Washing, Sorting, Pulping and Packing facilities will be installed. It is recommended to acquire Chinese or Italian technology, which is more durable and reliable.

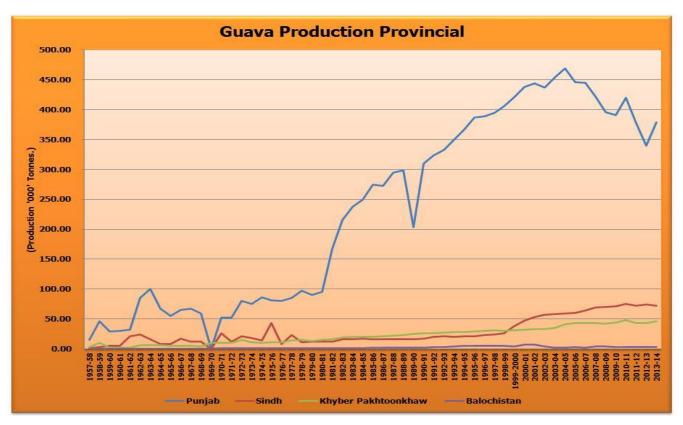

April 2017

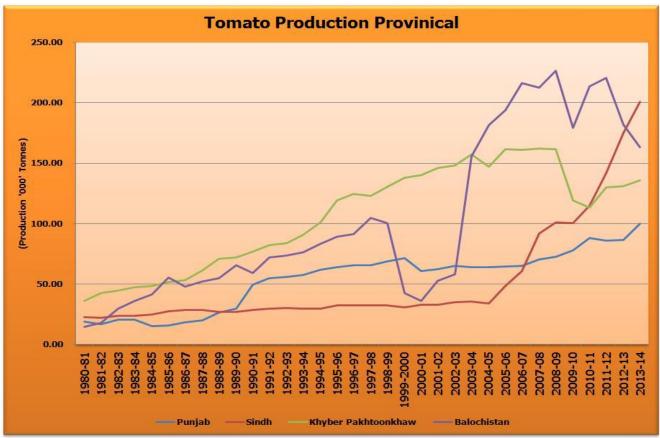

4.1 Province Wise Production of Mango, Guava & Tomato

Following graphs show province wise production trends of Mango, Guava and Tomato. It also shows that these fruits & vegetable are produced in abundance.¹

¹ http://www.amis.pk/Agristatistics/production.aspx

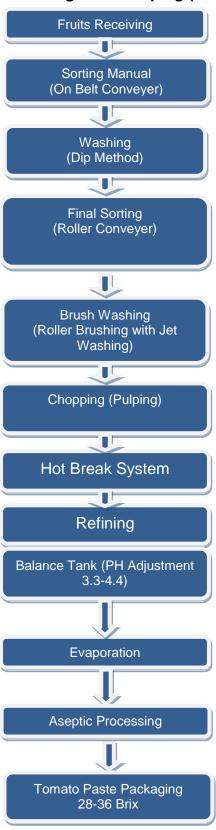

4.2 Production Process Flow

The production process flow of the proposed venture mainly comprises of Pulping unit. The process flow for Tomato slightly differs from Mango & Guava and are presented in the following diagrams:

Process Flow for Fruit Pulping (Mango and Guava)

Process Flow for Vegetable Pulping (Tomato Paste)

4.3 Installed and Operational Capacities

The proposed Fruits & Vegetables Pulping Unit has an installed input capacity of processing 30 tons of Mango, 23 tons of Guava and 20 tons of Tomato per hour. The unit has the maximum capacity of producing 17,280 tons of Mango Pulp, 14,720 tons of Guava Pulp and 2,170 tons of Tomato Paste annually based on 16 hours of plant operations. As the fruits (i.e. Mango and Guava) and vegetable (i.e. tomato) are seasonal commodities, therefore, pulping of fruits and vegetables will be done on seasonal basis. Following is the pulp processing calendar indicating the duration and months:

| | | Fruits & Vegetables Pulp Processing Calendar | | | | | | | | | | | | | | | | | | | | | |
|--------|---|--|--|--|-----|---|---|-----|---|---|-----|---|---|-----|---|---|-----|---|-----|---|---|-----|---|
| CROP | J | JAN | | | FEB | } | - | MAF | ? | - | APR | 2 | ı | MAY | 1 | , | JUN | , | JUL | • | - | AUG | ; |
| Guava | | | | | | | | | | | | | | | | | | | | | | | |
| Tomato | | | | | | | | | | | | | | | | | | | | | | | |
| Mango | | | | | | | | | | | | | | | | | | | | | | | |

The unit will process Mango Pulp for 60 days, Guava Pulp for 50 days and Tomato Paste for 40 days. The maximum operational time of plant is assumed as 16 hours however, initial operational capacity is assumed at 50% with an annual growth rate of 10% up to maximum level of 100% capacity utilization in 6th year of operation. This production capacity is estimated to be economically viable and justifies the capital as well as operational costs of the project.

Details of operational and installed capacity according to product mix are provided in the table below:

Table 1: Installed and Operational Capacities – Fruit Pulping

| Description | Production Capacity Per hour (tons) | Total Input Capacity of Fruit in tons (16 hour shift basis) | Total Output Capacity of Pulp in tons (16 hour shift basis) | Operational Output Capacity (50%) of Pulp - in tons (Year 1) |
|-------------|--|---|---|--|
| Guava | 23 | 18,400 | 14,720 | 7,360 |
| Tomato | 20 | 12,800 | 2,170 | 1,085 |
| Mango | 30 | 28,800 | 17,280 | 8,640 |

5 CRITICAL FACTORS

- ⇒ Complete adherence to technical knowledge & experience in the field of horticulture and in fresh fruit processing business is absolutely critical to the success of this project.
- ⇒ Awareness about HACCP standards and strict quality assurance of process and products
- ⇒ Selection of quality fruits and vegetable on the basis of best analysis of cost and revenues for a given season; cost efficiency through better management of the supply chain.
- ⇒ Appropriate post-harvest arrangement for transportation of product to the processing unit.
- ⇒ Appropriate storage arrangement and internal control for processed pulp; cold chain refer container arrangements for transportation to local and international markets.
- ⇒ Properly trained staff should be engaged and comprehensive staff training programs to be adopted for capacity building.
- ⇒ Careful selection of good location and purchase of land at competitive price.
- ⇒ Effective marketing and distribution of the product particularly to the importing countries, industrial units and foreign store chains.
- ⇒ International certifications and knowledge about food product regulations in the importing Countries.

6 GEOGRAPHICAL POTENTIAL FOR INVESTMENT

The unit can be installed anywhere in Pakistan where the raw materials (fresh fruits i.e. Mango & Guava and vegetable i.e. Tomato) are easily accessible with minimal transportation cost.

As per available fruit production data, major mango orchards are in South Punjab and Rural Sindh, while orchards of guava are mainly in upper Punjab, Hyderabad, Larkana, Moro, Haripur, Kohat and Bannu. Therefore, following urban areas could be the most appropriate locations for the proposed unit:

Multan, Muzaffargarh and Khanewal.

7 POTENTIAL TARGET CUSTOMERS / MARKETS

The proposed unit will produce pulp of Mango, Guava and paste of Tomato. All of these products are not directly catered to general consumers but target the industrial consumers. For instance, pulp is used as basic raw material for production of juices, ice creams, frozen deserts, flavoured yogurts, jelly, jams and many others. And Tomato paste is used as raw material for cooking & tomato ketchup production. Accordingly, the main buyers of fruit pulp will be manufacturing concerns of stated value added fruit products and fruit juice producers both in local and international markets. On the other hand, major buyers of tomato paste are either export markets or local tomato ketchup producers.

The main export markets for Pakistani processed fruits / pulp are including USA, Europe, Middle East, Far East, Canada, Africa and Sri Lanka.

8 PROJECT COST SUMMARY

8.1 Project Economics

All the figures in this financial model have been calculated for installed capacity of 17,280 tons of Mango Pulp, 14,720 tons of Guava Pulp along with 2,170 tons of tomato paste (28 - 32 Brix) per year with an initial operating capacity of 50% (for both Pulping & Paste).

The following table shows Internal Rate of Return, Payback Period and Net Present Value of the proposed venture.

Table 2: Project Economics

| Description | Details |
|----------------------------------|----------|
| Internal Rate of Return (IRR) | 30% |
| Payback Period (Yrs.) | 4.84 |
| Net Present Value (Rs. Millions) | 1,224.73 |

8.2 Project Financing

It is assumed that the project will be financed through 100% Equity.

8.3 Project Cost

Following fixed and working capital requirements have been identified for operations of the proposed business.

Table 3: Project Cost

| Description | Amount Rs. Million |
|--------------------------------|-----------------------|
| Capital Cost | |
| Land | 60.000 |
| Building / Infrastructure | 187.793 |
| Plant and Machinery | 1,150.575 |
| Furniture and Fixtures | 1.547 |
| Office Vehicles | 6.215 |
| Office Equipment | 2.370 |
| Pre-operating Cost | 36.709 |
| Misc. and Contingency | 28.170 |
| Total Capital Cost | 1,473.379 |
| Working Capital | |
| Equipment Spare Part Inventory | 3.000 |
| Upfront Insurance Payment | 6.515 |
| Cash | 43.009 |
| Raw Material Inventory | 219.452 |
| Total Working Capital | 271.976 |
| Total Project Cost | 1,745.355 |

8.4 Space Requirement

Approximately 6 acres of land would be required for establishment of proposed unit, it is recommended that required land should be procured in the industrial estates of identified potential cities. The cost of land is estimated at a rate of Rs. 10 million per acre within the vicinity of Multan, Muzaffargarh & Khanewal; hence total cost of required land is Rs. 60 million.

The infrastructural requirements of the project mainly comprises of the construction of Management Building, Sorting, Processing Hall, Cold Store, Fruit Ripening Area and other facilities. The cost of construction of building for the proposed unit is provided in the table below:

Table 4: Space Requirment

| Description | Unit | Quantity | Unit Cost (Rs.) | Total Cost (Rs. Million) |
|-------------------------|---------|----------|--------------------|--------------------------|
| Office Block | sq. ft. | 2,500 | 3,000 | 7.500 |
| Committee Room | sq. ft. | 1,500 | 3,000 | 4.500 |
| Micro Lab, Lab & Office | sq. ft. | 1,300 | 3,000 | 3.900 |
| Processing Hall | sq. ft. | 10,000 | 1,500 | 15.000 |
| Sorting Hall | sq. ft. | 2,500 | 1,500 | 3.750 |
| Cold Storage | sq. ft. | 12,000 | 1,500 | 18.000 |
| Machine Room | sq. ft. | 1,000 | 2,000 | 2.000 |
| Lobby | sq. ft. | 750 | 2,000 | 1.500 |

| Plastic Crates | 100,000 | 600 | 60.000 |
| Total - F | | | 60.000 |

8.6 Furniture & Fixtures Requirement

Details of the furniture and fixture required for Fruit & Vegetable Pulping unit are given below:

Table 6: Furniture & Fixture

| Description | Quantity | Unit Cost Rs. | Total Cost Rs. Mn. |
|--|----------|------------------|-----------------------|
| Managers Tables | 12 | 25,000 | 0.300 |
| Manager / Officers Chairs | 12 | 10,000 | 0.120 |
| Visitor Chairs | 24 | 7,500 | 0.180 |
| Officers Tables | 10 | 20,000 | 0.200 |
| File Racks | 12 | 15,000 | 0.180 |
| Sofa Set | 2 | 30,000 | 0.060 |
| Split AC 1.5 Ton | 7 | 65,000 | 0.455 |
| Misc. & Contingency | | 5% | 0.052 |
| Total Furniture & Fixtures Cost | | | 1.547 |

8.7 Office Equipment Requirement

Following office equipment will be required for Fruit & Vegetable Pulping unit.

Table 7: Office Equipment

| Description | Quantity | Unit Cost Rs. | Total Cost Rs. Mn. |
|------------------------------------|----------|------------------|-----------------------|
| Laptop | 1 | 150,000 | 0.150 |
| Computers With LCD | 18 | 75,000 | 1.350 |
| Printer | 3 | 25,000 | 0.075 |
| Scanner | 1 | 15,000 | 0.015 |
| Networking Equipment & Accessories | | | 0.150 |
| Telephone Exchange | 1 | 125,000 | 0.125 |
| Telephone Sets | 15 | 2,500 | 0.037 |
| Fax Machine | 1 | 25,000 | 0.025 |
| Photo Copy Machine | 1 | 200,000 | 0.200 |
| Water Dispenser | 2 | 20,000 | 0.040 |
| Refrigerator | 1 | 50,000 | 0.050 |
| Electric Water Cooler | 2 | 20,000 | 0.040 |
| Misc. & Contingency | | 5% | 0.113 |
| Total Office Equipment Cost | | | 2.370 |

8.8 Vehicles Requirement

Following vehicles will be required for the proposed unit:

Table 8: Vehicle Requirement

| Description | Quantity | Unit Cost Rs. Mn. | Total Cost Rs. Mn. |
|------------------------------------|----------|----------------------|-----------------------|
| 1300 CC Car (for CEO) | 1 | 1.659 | 1.659 |
| 1000 CC Car for Managers | 3 | 1.050 | 3.150 |
| 800 CC Car (Pool) | 1 | 0.900 | 0.900 |
| 70 CC Motorcycle | 3 | 0.070 | 0.210 |
| Registration Fee | | | 0.296 |
| Total Office Equipment Cost | | | 6.215 |

8.9 Raw Material Requirement

Mango, Guava and Tomato are the main raw material for the proposed business, which will be procured either directly from fruit farms or from distributors of local fruit market. After that, fresh fruit & vegetable will be processed and marketed through distributors and retailers in local market and through exporters in international market. According to the estimated installed and operational capacity of the proposed plant, following table provides the details of seasonal requirements of fresh fruits & vegetable as a raw material:

Table 9: Raw Material Requirment during Year 1

| Description | Cost / Kg (Rs.) | Raw Material Quantity (tons) | Total Cost (Rs. Mn.) |
|-------------------------------|--------------------|---------------------------------|-------------------------|
| Mango Pulping | | | |
| Cost of Mango | 30 | 14,400 | 432.000 |
| Aseptic Bag | 6 | 8,640 | 51.840 |
| Chemical + Polythene Bag | 1.5 | 8,640 | 12.960 |
| Ripening & Unloading of Fruit | 0.5 | 8,640 | 4.320 |
| Metal Drum | 17.5 | 8,640 | 151.200 |
| Total Mango Pulping | | | 652.320 |
| | | | |
| Guava Pulping | | | |
| Cost of Guava | 18 | 9,200 | 165.600 |
| Aseptic Bag | 6 | 7,360 | 44.160 |
| Chemical + Polythene Bag | 1.5 | 7,360 | 11.040 |
| Ripening & Unloading of Fruit | 0.5 | 7,360 | 3.680 |
| Metal Drum | 17.5 | 7,360 | 128.800 |
| Total Guava Pulping | | | 353.280 |
| | | | |
| Tomato Paste | | | |
| Cost of Tomato | 10 | 6,400 | 64.000 |

| Aseptic Bag | 6 | 1,085 | 6.509 |
|-------------------------------|------|-------|--------|
| Chemical + Polythene Bag | 1.5 | 1,085 | 1.627 |
| Ripening & Unloading of Fruit | 0.5 | 1,085 | 0.542 |
| Metal Drum | 17.5 | 1,085 | 18.984 |
| Total Tomato Paste | | | 91.662 |

The above raw material requirement is based on 50% capacity utilization and raw material requirement in subsequent years will be determined according to the capacity utilization of the unit. The raw material cost is assumed to increase at 10% annually. However, it is only estimated, as the market price of fruits & vegetables may vary due to market / seasonal fluctuations.

8.10 Human Resource Requirement

To smoothly run the operations of the proposed Fresh Fruits & Vegetable Processing Unit, details of required human resource along with their monthly salaries are recommended as under:

Table 10: Human Resource Requirment

| Description | No. of Employees | Monthly Salary per Person (Rs.) |
|---------------------------|------------------|---------------------------------|
| CEO | 1 | 250,000 |
| Plant Manager | 1 | 150,000 |
| Manager Finance & Admin | 1 | 150,000 |
| Manager Marketing | 1 | 100,000 |
| Marketing Executives | 2 | 40,000 |
| Manager Procurement | 1 | 100,000 |
| Purchase Officers | 3 | 30,000 |
| Assistant Manager – Plant | 1 | 60,000 |
| Quality Assurance Manager | 1 | 75,000 |
| Electrical In charge | 1 | 40,000 |
| Plant Supervisors | 3 | 40,000 |

| Mechanical Foreman | 1 | 40,000 |
|----------------------------------|----|------------|
| Boiler Engineer | 1 | 40,000 |
| Accounts officer | 2 | 35,000 |
| Store Keeper | 2 | 30,000 |
| Quality Assurance Officer | 3 | 30,000 |
| Assistant to Admin & HR | 1 | 35,000 |
| Office coordinator | 1 | 25,000 |
| Filler Operator | 2 | 35,000 |
| Supervisor | 1 | 25,000 |
| Boiler Operator | 1 | 30,000 |
| Cold Store Operator | 2 | 35,000 |
| Mechanic / Fitter | 3 | 25,000 |
| Electrician | 1 | 25,000 |
| Assistant Operator to Cold Store | 3 | 20,000 |
| Weigh Bridge Operator | 1 | 18,000 |
| Driver | 2 | 20,000 |
| Lifter Operator | 2 | 20,000 |
| Office Boy | 4 | 15,000 |
| Gardener | 1 | 15,000 |
| Sweeper | 2 | 15,000 |
| Guards | 4 | 15,000 |
| Total | 56 | 26,316,000 |

8.11 Utilities and other costs

During the first year at 50% capacity utilization the electricity expenses are estimated to be around Rs. 40.234 million whereas, gas expenses are estimated to be Rs. 35.878 million and fuel expense is around Rs. 114.810 million. Furthermore, promotional expense being essential for marketing of Fruit & Vegetable Pulping unit is estimated as 0.25% of revenue.

8.12 Revenue Generation

Based on the assumed capacity utilization for pulping Mango, Guava and Tomato, sales revenue during the first year of operations is estimated as under:

Table 11: Revenue Generation - Year 1

| Description | No. of units sold (tons) | Sale Price / Tons (Rs.) | Sales Revenue (Rs. Mn.) |
|---------------|--------------------------|----------------------------|----------------------------|
| Mango Pulping | 8,640 | 115,000 | 993.600 |
| Guava Pulping | 7,360 | 70,000 | 515.200 |
| Tomato Paste | 1,085 | 130,000 | 141.024 |
| Total | | | 1649.824 |

11 KEY ASSUMPTIONS

11.1 Operating Cost Assumptions

| Description | Details |
|--|------------------------|
| Administration Benefit Expenses | 5% of admin. expense |
| Traveling Expenses | 7.5% of admin. expense |
| Communication Expenses | 10% of admin. expense |
| Office expenses (stationary, entertainment, janitorial services, etc.) | 10% of admin. expense |
| Office vehicles insurance rate | 3% |
| Machinery & equipment insurance rate | 1% |
| Promotional expense | 0.25% of revenue |
| Operating costs growth rate | 10% |
| Raw material cost growth rate | 5% |
| Depreciation on Building and Infrastructure | 5% |
| Depreciation on Machinery | 10% |
| Depreciation on Furniture and Fixture | 10% |
| Depreciation on Office Equipment | 10% |
| Depreciation on Office Vehicle | 20% |

11.2 Raw Material Cost Assumptions

| Description | Cost Rs. / Kg |
|-------------------------------|---------------|
| Mango Pulping | |
| Cost of Mango | 30 |
| Aseptic Bag | 6 |
| Chemical + Polythene Bag | 1.5 |
| Ripening & Unloading of Fruit | 0.5 |
| Metal Drum | 17.5 |
| Guava Pulping | |
| Cost of Guava | 18 |
| Aseptic Bag | 6 |
| Chemical + Polythene Bag | 1.5 |
| Ripening & Unloading of Fruit | 0.5 |

| Metal Drum | 17.5 |
|-------------------------------|------|
| Tomato Paste | |
| Cost of Tomato | 10 |
| Aseptic Bag | 6 |
| Chemical + Polythene Bag | 1.5 |
| Ripening & Unloading of Fruit | 0.5 |
| Metal Drum | 17.5 |

11.3 Revenue Assumptions

| Description | Details |
|--|---------|
| Mango Pulp Price Per Kg (Rs.) | 115 |
| Guava Pulp Price Per Kg (Rs.) | 70 |
| Tomato Paste Price Per Kg (Rs.) | 130 |
| Growth is Sales Price | 10% |
| Mango Processing (in days) | 60 |
| Guava Processing (in days) | 50 |
| Tomato Processing (in days) | 40 |
| Days Operational / Year | 300 |
| Mango Pulping during first year (Tons) | 8,640 |
| Guava Pulping during first year (Tons) | 7,360 |
| Tomato Paste production during first year (Tons) | 1,085 |
| Per Day Production Hours | 16 |
| Production Capacity in First Year | 50% |
| Increase in Production Capacity every Year | 10% |
| Maximum Production Capacity | 100% |

11.4 Financial Assumptions

| Description | Details |
|-------------|---------|
| Equity | 100% |
